The Argos promise

Argos 16 DAY MONEY BACK GUARANTEE · OUR PLEDGE OF FULL SATISFACTION ·

If you change your mind and decide that a product you have bought does not meet your exact requirements, we offer you the opportunity of returning it within 16 days of purchase, for a full refund or exchange. We simply ask that it is returned in its original and unspoilt condition, with its original wrapping and your receipt. Please note this promise does not apply to earrings for pierced ears, food products, camcorders, pre-recorded music or videos, video game software or fresh flowers. This guarantee does not affect your statutory rights.

How to shop

Shopping is simple:

1 Write the catalogue number and the quantity of the goods you require on a selection form (there are some included in this catalogue as well as in-store).

2 Take the form to a service point.

3 Whilst you are paying, your goods will be brought to the collection counter ready for you to collect. Some of our larger items can also be ordered by telephone and delivered to your door. Please see page 635 for details.

Extended guarantees

Free Accidental Damage Cover

We also offer FREE first year accidental damage cover on all the items shown below (except camcorders). To apply simply pick up a leaflet in-store. If you do buy an Extended Guarantee, then we will automatically include the free accidental damage cover.

The following guarantees do not affect your statutory rights.

At Argos, our aim is to offer you high quality, reliable products - all of which carry a manufacturer's guarantee of at least 1 year.

However, for added reassurance we also offer 3 and 5 year Extended Guarantees at low, low prices. So now, at an affordable price, you can insure against possible repair costs after the manufacturer's guarantee has expired.

Underwritten by Cornhill Insurance PLC, our Extended Guarantees cover both parts and labour costs of faults arising due to faulty workmanship or materials used in manufacture.

A 3 year guarantee extends the manufacturer's guarantee (usually 1 year) to a total of 3 years from the date of purchase. A 5 year guarantee extends cover to a total of 5 years from the date of purchase. Our full range of Extended Guarantees is shown in the table opposite.

How to Purchase

Buying an Extended Guarantee is simple, and can be done at the same time as buying any other Argos product.

1. Fill in the appropriate catalogue number on a selection form.
2. Take the form to a service point.
3. After paying, you will be directed to the collection counter where a member of staff will take all the necessary details to complete your insurance cover.
4. You will then be given a copy of the agreement to keep. This will also tell you what to do if you need to make a claim.

PLEASE NOTE:
You must purchase Extended Guarantee cover **within 30 days of purchasing the item** to be covered. If you have any queries about your insurance cover, please use the Cornhill Insurance helpline 0892 515414 during normal office hours. **Unfortunately we cannot insure items for commercial use.** Please ask in-store for full terms and conditions.

A GUIDE TO gardening

The choice of lawnmowers is becoming more and more complex as manufacturers develop and refine existing technology. We have outlined below some key factors which you should consider before you purchase your equipment.

Power Choice

Petrol
The key benefit of a petrol-powered mower is the freedom it gives you - you are not constrained by proximity to power points. A petrol engine generally provides greater power than an electric motor and will be more suitable for large gardens.

Electric
Electric mowers are lighter to use, and start at lower prices. Power output is measured in watts and as with petrol engines, the larger the motor, the bigger the power output.

Choice of Cut

There are two basic methods by which mowers cut - Rotary and Cylinder. Rotary blade mowers come in two types - wheeled and hover.

Rotary Cut
Wheeled rotary blade machines are available in a range of sizes suitable for most gardens. Most collect the grass and can cut close to the edge of the lawn. Some have rollers to stripe the lawn as it is being cut.
All our hover mowers are electric, easy and flexible to use. They operate by literally hovering just above the ground as they cut. There are 2 types of hover mower, ones which simply cut the grass and ones which cut the grass and collect it.

Cylinder Cut
This is the traditional English way of striping your lawn. Variable height blades positioned at the front of the mower give a clean, neat finish. All our cylinder mowers collect the grass.

Garden Tools

Grass Trimmers/ Edgers
These cut grass around the areas inaccessible with a lawnmower, i.e. close to walls, around trees etc. They work by having a length of nylon line spinning at speed, which cuts the grass.

Hedge Trimmers
These are purpose built to keep your hedge looking perfect; they work by way of "scissor" action with the blades moving rapidly back and forth.

Garden Shredders

These products reduce your garden waste - leaves, hedge cuttings, small branches etc, into a smaller size, enabling good compost to be produced much more quickly.

GARDENING SAFETY TIPS

Together with RoSPA® we have identified some key safety tips you should follow in the garden.

- Always follow the manufacturer's instructions very carefully.
- Always fit a residual current device (RCD) to the electric socket for added protection. This disconnects the electric circuit if there is a fault (order Cat. No. 982/1321).
- Never use an electric mower in damp conditions and do not attempt to lift the mower whilst the blade is rotating.
- Always wear safety goggles, stout shoes and hand protection where necessary - particularly on rough ground (order Argos DIY Safety Kit 701/0660).

A GUIDE TO power tools

SUPPLIER HELPLINES

To help you choose the right tools for DIY jobs at home we have explained some of the more common features.

Power Drills and Screwdriver Features

Input Wattage
The power of the motor in your drill is measured by "input wattage". For tough heavy duty jobs, or frequent and prolonged use, a drill with a high rating is important.

Chuck Size
This refers to the diameter of drill bit shank which can be put into the drill.

Speed
Varying materials and hole sizes require different speeds and power.

Single Speed
For straight forward drilling into wood, metal and plastic, a single speed drill may be suitable.

Two Speed
Drills with two speeds allow greater flexibility in drilling through hard or soft materials. A two speed drill will also allow you to select either fast or slow speed measured in RPM (revolutions per minute). The higher the RPM, the faster the rotation of the drill. When drilling into hard materials like masonry, you need to use higher speeds with hammer action.

Variable Speed Drills
For more control and precision a variable speed drill may be suitable. It will allow you to tackle a variety of tasks in different materials and thicknesses with greater accuracy than the two speed drills.
Always read the manufacturers' instructions before using variable or two-speed drills.

Reversing
The drill is able to rotate in the opposite direction to normal. This is handy for screwdriving or removing a sticking drill bit.

Hammer Action
For tough jobs like masonry or concrete drilling. A drill with a hammer action literally "hammers" the drill bit into the wall (thousands of times a minute), as well as rotating it.

Torque Control
Drills with torque control continuously monitor the "resistance" to the drill bit. This means that if you suddenly encounter an impenetrable area, the drill will stop rather than risk damage to itself. Torque control is particularly useful if you intend using your drill as a screwdriver as it "feels" the resistance of the screw and prevents over tightening.

HELPLINES
For any queries about your drill ring the appropriate telephone number during normal office hours.

POWER DRILLS SAFETY TIPS
In conjunction with RoSPA the Royal Society for the Prevention of Accidents, we have put together the following safety advice.

- ▲ Always read and follow the manufacturer's instructions before starting work. If you lend equipment, make sure that the user reads the instructions for reference.
- ▲ Always fit a residual current device (RCD) to the electric socket and test it before using a power tool. This disconnects the electric circuit if there is a fault (order Cat. No. 982/1321).
- ▲ Wear safety goggles for DIY activities.
- ▲ Unplug the drill before fitting bits and use good quality sharp bits in the drill, making sure they are secured firmly in the chuck.
- ▲ Don't leave cables trailing over the edge of the work surface. When the job is finished, put the drill away.

A GUIDE TO cordless power tools

Buying the right tools for the job can be the key to successful DIY.

As cordless drills and screwdrivers have rechargeable batteries and no extension leads, they can operate at any distance from a mains supply. Cordless drills can still be used to drill holes in wood, metal, plastic and masonry if they have a hammer action facility. Those featured with variable speed and reverse can also act as a screwdriver.

Cordless Drill and Screwdriver Features

Voltage
The higher the voltage of a battery the more power the drill has for tougher jobs.

Trickle Charge
The batteries are charged slowly while the tool is not in use (i.e. overnight). They can be left on continuous charge with no harm to the batteries, so the tool is always ready to use.

Fast Charge
The batteries can be charged in approximately one to three hours depending on specification (but cannot be left on charge permanently).

Spindle Lock
Spindle lock allows a powered screwdriver to be used as a conventional hand screwdriver, particularly useful for exceptionally tough screws.

Keyless Chuck
Allows you to change a drill bit quickly without the need for a chuck key.

Removable Battery
A rechargeable, removable battery allows greater flexibility and continuous use, as a second battery can be charged whilst the drill is in use.

HELPLINES
For any queries about your drill ring the appropriate telephone number during normal office hours.

A GUIDE TO keep fit

Stay in shape at Argos

Our range of in-home exercise equipment will enable you to exercise where and when it suits you. We have equipment to develop strength and stamina for men and women of all ages, for beginners and for experts. Whether you're looking for light exercise or for something more "serious", at Argos, we know how to take care of it.

Before you start, we recommend two key safety tips.

- Always consult your doctor before starting a new exercise programme which will involve a major increase in exercise compared to what you are used to.
- Never let children near any equipment whilst in use as serious injuries can be caused by moving chains, wheels and spokes.

Strength Training

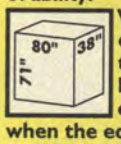

There is a variety of keep fit equipment available at Argos which primarily helps to build up your strength.

Weights and Benches

are the simplest way to increase your strength. With weights you can use either a barbell or dumb-bell bar depending on the type of exercise you want to do. If you use a bench in conjunction with a set of weights it will allow you to develop your own training programme.

Multigyms

are the most comprehensive fitness and body building machines for developing your muscles. They are fully adjustable so that you can progressively increase and decrease the weights and resistance on them. Our multigyms will suit everyone, whatever your age, sex or level of ability.

We've included a dimensions box next to each multigym, but do allow for the extra space needed when the equipment is in use.

Stamina Building

If you are looking to build up your stamina through exercise then have a look at our range of Exercise Bikes, Rowing Machines, Steppers and Treadmills.

Exercise Bikes

help to build up your aerobic capacity and are particularly good at helping to tone up the muscles in your buttocks, hips, thighs and legs.

Dual action cycles have adjustable pivoting handlebars enabling you to pedal and row, exercising the upper and lower body at the same time.

Rowing Machines

are the single best machines for all round exercise by strengthening your legs and exercising your upper body.

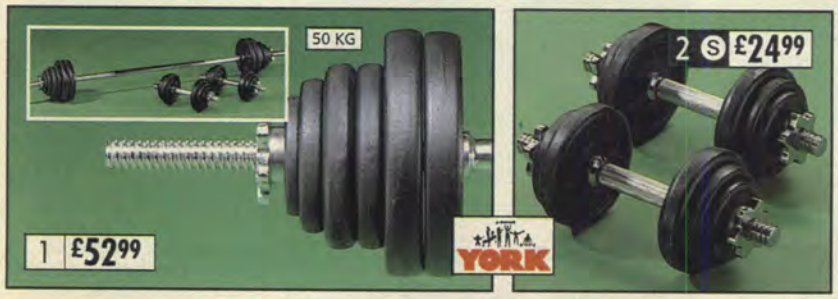

Steppers

provide one of the best forms of cardiovascular workout, using the largest body muscle groups and strengthening, toning and contracting muscles. Steppers are available in various formats from basic floor steppers to stepper climbers with electronic monitoring.

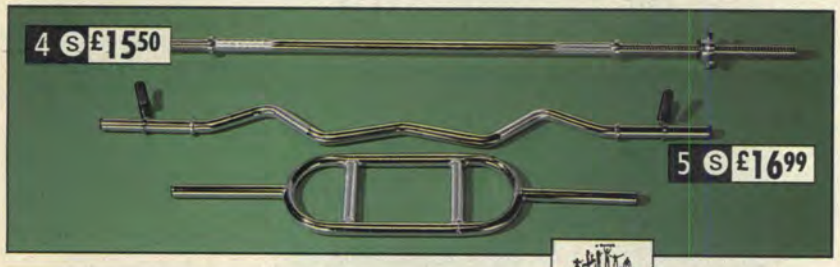

Treadmills

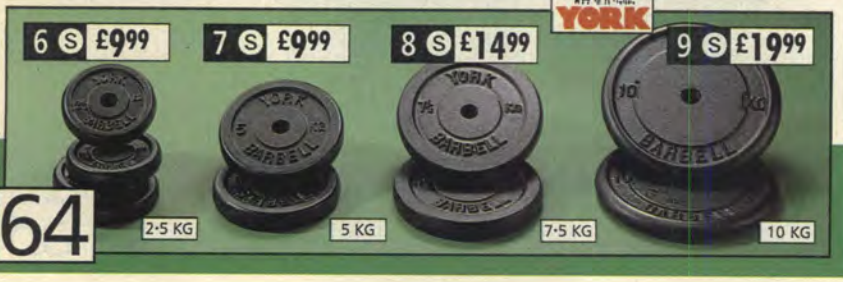

are similar to jogging and walking and are renowned as one of the most intensive work-out machines.

Now we've given you some key tips on keep fit equipment, have a look through the catalogue to see our full range and let Argos take care of it.

A GUIDE TO beds

At Argos we offer a comprehensive range of beds which provide a high standard of quality and comfort at affordable prices. When choosing your bed the combination of mattress and base play an important part.

The Mattress

Open Coil Springs. Rows of tempered springs are linked together with helical wires to spread your weight evenly across the mattress.

The Base

The firmness and support of the mattress is further complemented by the type of base.

Platform Top
With no springs, which adds greater support to the mattress.

Care of your New Bed

After delivery, keep the bed uncovered for a few hours to allow the mattress to air thoroughly. Do not roll or bend the mattress. Turn the mattress frequently from end-to-end and side-to-side.

Headboards available on page 89.

Every Bed complies with the British Standard BS7177 for resistance to ignition of mattresses, divans and bed bases.

Airsprung Manufactured under a quality system approved by BS5750. Made with individually tempered springs and spring units. These units are covered with a unique bonded natural coir fibre insulation pad called "Fitex" which virtually eliminates spring feel; softer upholstery layers are then added to increase overall comfort. A deep quilted finish maintains a constant high level of comfort to the total sleeping area.

Layezee BEDS BS5750 APPROVED MANUFACTURER
Manufactured under a quality assurance system accredited to BS5750, the deep quilted mattress features a traditional spring unit, upholstered with layers of natural fillings and covered with a durable, printed fabric.
Layezee Beds combine comfort with the correct level of support to ensure a good night's sleep.

Dorlux Manufacturer's accredited with BS5750 quality management standard.
Made with a premium quality spring unit, each is upholstered in layers of natural and man-made fibre fillings, ensuring the correct level of support and exceptional comfort. For tufted mattresses the fillings are held securely together by passing a series of tapes right through the mattress and securing them with a felt washer.

Silentnight Beds THE CLASSICAL SLEEP SYSTEM
Luxuriously microquilted and combined with a unique head to toe spring unit. Springs are joined by helical wires transferring weight up and down, not across, resulting in **no roll together**.

A GUIDE TO computers

Computers

The Argos range of PCs has been chosen to offer a choice of configurations, and all come pre-loaded with a suite of software to enable you to get started right away.

Features

Processing Speed
The speed of the computer is determined by both the processor type and the clock speed. The clock speed is measured in megahertz (MHz), the higher the MHz, the faster the processing.

Memory
Computer memory size is judged by how many bytes of data it can hold, normally measured in megabytes (1 MB ~ 1 million bytes).

Random Access Memory (RAM)
This is the working memory utilised whilst in operation. Information held in the RAM is lost when the computer is switched off, therefore this needs to be stored on hard or floppy disks.

Hard Disk Drive
This is a permanent high capacity storage device which is located in the system unit. The pre-loaded operating systems and application software are stored on the hard disk drive.

Floppy Disks
These diskettes enable you to introduce new programs to the PC and also to store information externally from the computer. The amount of information that can be stored depends on the size and density of the diskettes.
The PCs available from Argos are all fitted with a 3.5" floppy disk drive which operate with both double and high density diskettes.

CD-ROM Drive
Compact Disk Read Only Memory. This is a device for reading information stored on compact disk.

Multi-Media
Multi-Media uses the PC to mix still and motion video, sound, text and graphics to present information, eg an encyclopedia, in an interactive form.

Sound Card
A sound card greatly enhances the PC's sound capabilities.

VESA Local Bus
The Opus range of PCs provide expansion slots to enable the use of VESA (Video Electronics Standard Association) Local Bus Peripheral cards.
A graphics card will enhance the speed and performance of graphics, and a Hard Disk Controller Card speeds up the movement of information between the Hard Disk Drive and the Processor.

A GUIDE TO printers

The most common printer used with word processors and PC's is the Dot Matrix. Recently, ink or bubble jet printers have become more popular.

The Dot Matrix

These printers create an image on the paper using a row of 9, or in the more expensive models 24 pins. The pins rapidly strike a ribbon onto the paper. A 24-pin printer is able to create a much smoother outline for letters and graphics since it uses more dots per inch.

Ink/Bubble Jet Printers

These printers use a non-impact method of printing. An ink jet is activated by a pump, or in the case of Bubble Jet printer, by heat creating steam pressure in the ink tube. This forces the ink onto the paper creating the image with near laser quality print. A key benefit is it prints more quietly.

DPI (Dots Per Inch)

This refers to the density of the print, the higher the DPI, the higher the density of the print.

Variable Print Speed

Variable print speed is measured in CPS (characters per second). The slower the speed, the greater the print definition.

Common Terminology

Draft: Low density, fast printing to check accuracy and initial layout of document.
NLQ: Near letter quality.
LQ: Letter quality.

Friction Feed Facility

enables you to handle single pages through the printer whereas the Pull Feed Tractor facility handles a continuous supply of paper.

Buffer Memory

This enables you to store information being transmitted from the PC ready for printing.

Fonts

These are different typestyles to enable various presentations of your work.

ARGOS MAIL ORDER

We operate a mail order service for fax and printer accessories. For credit card orders, please ring 061 976 4505 (24 hour service) or alternatively pick up an order form from your local Argos showroom. No stamp required.

A GUIDE TO fax machines

A fax machine needs to be plugged into a new style phone socket and the mains.
Some fax machines have an internal fax switch and can direct the incoming call to either the fax or telephone as appropriate, others also allow connection to an answering machine.
However, if you have extension phones you will require an external fax switch. This enables the use of the fax with an answering machine and extension phone all on one line.
To help you with your choice, we have identified some key features.

Features Guide

Half Tone Reproduction
produces shades of grey and not just black and white, giving greater clarity for photographs or brochures.

Superfine/Fine Mode
allows for a better reproduction of detailed documents/drawings with the facility for fine print.

Auto Document Feed
lets you set up a number of pages for automatic transmission or copying in sequence.

Activity Report
provides a summary of information transmitted and received.

REN
The maximum Ring Equivalent Number for a phone line is 4. Your equipment may not function correctly if this is exceeded.

A GUIDE TO typewriters & word processors

If you are building up your business, from an office or your home, you will be looking for the latest office equipment. At Argos we now sell a wide range of business equipment, and all at affordable prices. To help you with your choice we have explained some of the features relating to our range of Typewriters and Word Processors.

Typewriter Features

Correction Memory
This enables you to correct up to two lines of current text so if an error is made you can simply relocate and delete it.

Text Memory
This facility allows you to store information/text of varying amounts. This can range from 3 pages of text with a 6K memory to 6 pages of text with a 12K memory capacity.

LCD
Liquid Crystal Display (LCD) allows you to review and edit text easily on screen before printing.

Justification
This allows documents to be produced with the right hand margin blocked so sentences are of equal proportion regardless of the number of words, giving a professional appearance.

Spellcheck
Spelling mistakes can be checked, enabling documents to be free from spelling errors.

Print Speed
This is measured in CPS (characters per second).

Typing Pitch
The pitch designation represents the number of characters that can be typed per inch.

Decimal Tabulation
This facility automatically positions the carriage for alignment of numbers at the decimal point.

Word Processor Features

Word Processors offer all the benefits of an advanced typewriter but with the additional features of larger displays and a bigger memory capacity. The memory of all our Word Processors can also be expanded by the use of an external 3½ inch floppy disk.

Block Copy/Move/Delete
Blocks of text can be copied, moved or deleted to allow simple and quick editing.

Search and Replace
This enables editing of a specific word or phrase throughout a piece of text in one single operation.

Address/Mail Merge
A list of names and addresses can be merged with a letter, this enables you to provide personalised correspondence easily.

Autospell
If a word is misspelt this facility provides alternatives and automatically replaces them.

MS Dos File Format Compatibility
This allows storage of information in DOS format to enable data exchange with PC's. We have a wide range of office equipment for your office or your home, so let Argos take care of it.

Argos Mail Order Service

To cater for all your needs we also offer a mail order service for ribbons, daisy wheels and software accessories on typewriters and word processors. Simply call 061 976 4505 (24 hours) for credit card holders, or alternatively pick up an order form from your Argos store. No stamp is required.

A GUIDE TO telephones

Argos offers a wide range of telephones and to help you choose, we have explained the features available.
All Argos phones need a plug-in type socket. If you do not have this type of socket, contact British Telecom and enquire about conversion.

Features Guide

Memories
You can store your frequently used or important numbers, and recall them at the touch of a button or two.

Last Number Re-dial
The telephone can automatically re-dial the last number you dialled, which is very useful when a number is engaged.

Mute (Secret) Button
This allows you to speak to other people in the room without being overheard by your telephone caller.

On Hook Dialling/ Hands Free Speech
"On Hook Dialling" enables you to dial without lifting the receiver. A speaker allows you to hear when the phone is answered, then you simply pick up the handset to speak.
"Hands Free Speech" allows you to speak and listen with the receiver still in place.

Ring Equivalent Number (REN)
The number of the telephones you can connect to a line is determined by the REN of each telephone. The maximum total REN for a telephone line is 4.

Volume Control
This allows you to adjust the volume of the telephone ring.

PABX
PABX compatible telephones can be used with most PBX exchange or switchboard systems. Please see the manufacturer's instructions, or use the helplines for further details.

Cordless Phones
Cordless phones allow you to receive or make calls around the home and even in the garden. You can page the handset (or user!) from the base unit, and some also have an **intercom** between the base unit and the handset.

The base unit must be connected to a mains supply as well as an approved telephone socket. The handset recharges whilst it is in the base unit. A battery back-up enables the telephone to be used during a power cut.

The quality of reception is unlikely to be as clear as with a conventional telephone as they are susceptible to interference from other cordless phones and radio transmissions, especially over long distances and obstructions (walls or doors). Cordless phones operate on 8 different channels - as marked on the box. **Dual channel** telephones have 2 channel options so you can switch the handset and base unit to the alternative channel.
8 Channel Automatic Scanning - cordless telephones will scan all of the 8 available channels to provide the best reception when a call is made. Should interference occur during the course of a call the operating channel can be changed by pushing a button on the handset.
Compander/Digital Noise Reduction - is now available on many newer cordless phones offering improved reception by filtering out background noise. Cordless phones are also available as combination units with an answering machine or speakerphone in the base.

Network Services
If you have a dual signalling (Pulse/Tone) or *Touch Tone*[1] telephone, you will be able to use the new BT "Network Services" including call diversion, 3-way calling, reminder calls and call waiting. These additional services are available from BT for a quarterly rental charge, please contact your local BT office for further information.

Mercury
You can now use the "Mercury" network from your home via a British Telecom line. For a small annual fee you will receive your own PIN code giving you access to cheaper long distance and international calls[2]. A "Mercury" button will allow one-touch dialling into the Mercury system. Other "Mercury compatible" telephones enable programming of the sequence into a normal memory.
Please phone the Mercury Helpline 0500 500 194 for further details.

ANSWERING MACHINES WITH TELEPHONES FROM ONLY £39.50

mega.books

A GUIDE TO answering machines

An answering machine will record messages and many include a handset for use as a normal telephone. To install your machine you need a 13 amp mains socket near to a plug-in telephone socket. A separate answering machine may also need a telephone socket doubler to connect alongside your telephone. This is indicated in the text where necessary.

Features Guide

Cassette Tapes
Most machines use a micro, rather than a standard size cassette.

Digital Outgoing Message
Your outgoing message is recorded onto a digital voice chip, avoiding the need for the tape to shuttle between the outgoing and incoming messages, thus cutting down on the waiting time of your caller.

Digital Voice Prompt
A digital voice will guide you through the various operations, and give you information such as the number of calls received.

Day/Time Stamp
This records the exact time and day of all incoming messages.

Memo Facility
You can leave a message on your machine for someone else to access on their return.

Call Screening
This allows you to listen whilst the answering machine takes your call, and choose whether or not to answer personally.

Answer Only Option
The answering machine can answer a call without taking a message. This is useful if you are away for several days.

Two Way Conversation Recording
This allows you to record a telephone conversation, and can be useful when listening to directions or instructions.

Branch Phone Reset
Your answering machine will stop and reset automatically when you intercept a call on another extension.

Remote Message Retrieval
You can check your calls even while you are out. Using a 'Touch/Tone telephone (which produces a variety of tones as you dial) or a remote control device, tone retrieval activates your answering machine to play back any recorded messages. Some machines can also execute other remote functions such as changing the outgoing message. 'Touch/Tone is a BT registered Trade Mark.

Call Count
This will display how many calls have been recorded usually on an LCD panel or by a flashing LED.

GAS FIRE AND SURROUND

SURROUND 1 £359.99

PRIOR TO PURCHASE: We recommend that this inset gas fire (item no 2) is used in conjunction with the "Fareham" fire surround (item no 1). If an alternative surround is used, it must have a non-combustible back panel and hearth.

NB: The distance between the mantlepiece (Av 6 inch thick) and the top of the fire must be in excess of 6 inch. The chimney must be of a Class 1 construction and we recommend that it is swept prior to installation.

Gas appliances should only be connected by an approved CORGI installer (Council for Registered Gas Installers) who will undertake gas work, final connection, and safety checks.

For any queries regarding this fire please phone 0352 730903 during office hours.

For installation, please telephone 0703 556235 or contact your local CORGI installer.

FLEECY

FLEECY FITTED MATTRESS COVER
Combines a fully fitted underblanket with a fleecy mattress cover for maximum warmth. All-night use and pre-heating facility with extra foot warmth.

FOR YOUR INFORMATION

DUAL CONTROL
Some of the double under/over blankets featured have dual controls. This enables the two sides of the bed to be at different heat levels, according to personal need.

HEAT LEVELS
All our electric under/over blankets have 3 or more heat levels. The higher the number, the hotter the temperature.

ALL-NIGHT USE
Under/Over Blankets: All electric under/over blankets, B.E.A.B. approved, are suitable for all-night use, plus the normal full pre-heating facility. All our electric blankets have full overheat protection.

DE LONGHI RFE ROTOFRYER.

Cat. No. 421/2818 **£59.50**

DE LONGHI ROTOFRYERS.
Require half the usual amount of oil which means frying temperatures can be reached more rapidly and maintained longer. The angled baskets revolve on a motorized axis, resulting in the food being alternately dipped into and taken out of the hot oil. Food is left uniformly fried, less saturated and crisper. Should an obstacle hamper the progress of the basket, it reverses its rotation automatically. Both fryers feature:
- 1.75 pint oil capacity.
- 2.2lb food capacity.
- Hermetically sealed lid with anti-odour charcoal filter.
- Variable thermostat.
- Safety rise & fall basket.
- Condensation collecting container.
- Temperature control light.

"ROTOFRI" WITH DeLonghi

Here's an Extraordinari idea to save cooking oil and lighten your fried food.
DeLonghi Rotofryers have a unique angled basket which rotates - it cooks by dipping the food in the oil and allows a full 2lb load of chips to cook in just over one litre of oil.
And with the cooler wall FPEC model there's another Extraordinari feature. When the oil has cooled, just drain it straight back into the bottle. So easy you'll be able to keep your fryer clean by emptying the oil every time.

ROTOFRYER FPEC

- Full capacity, half the oil.
- Oil drain system.
- Cooler wall body.
- Rise and fall basket operated from outside.
- Sealed lid.
- Thermostat to avoid oil overheating.
- Twin filter system with "change filter code".
- Push button lid opening.
- Cord storage.

A GUIDE TO microwave ovens

To help you choose we have explained a little about microwave ovens and their benefits.

The Benefits of a Microwave Oven

- Microwave ovens can be used for most types of cooking, for defrosting, and for reheating pre-prepared foods.
- Cooking by microwave is up to 75% faster than a conventional oven and, as less energy is used, is more economical.
- Food cooked in a microwave oven remains nutritious and tasty since the food is cooked so quickly that it retains more of its goodness, with less loss of vitamins and minerals. Most food can also be cooked without the addition of fat.

How a Microwave Oven Works

Microwaves produce heat by friction, caused by the moisture molecules in food vibrating against each other very quickly. Microwaves penetrate the food surface and the heat is then transferred to the centre of the food by means of conductivity, hence the need to allow for standing time and stirring.

Quality and Safety

All our microwave ovens conform to both British and International Electrotechnical Commission Standards of Safety. They are also appraised by our own Quality Control Department.

Most new microwave ovens now display a label relating to the new heating instructions on small food packs (eg ready-made meals for 1 or 2 people).

This is an example of the oven label*:-

By matching up the information on the food pack with that on the oven, you will be able to calculate more accurately the heating time required.
For further information please call the Independent Food Safety Advisory Centre on 0800 282407.
***Reproduced by permission of MAFF from "A Guide to the new Microwave Labels".**

Points to Remember

- Allow sufficient standing time after cooking for heat to pass to the centre of the food.
- If possible, stir or rearrange food halfway through cooking, reheating or defrosting to ensure even heating.
- Reheating of food must be carried out at a temperature higher than 70°C for at least 2 minutes.
- Food straight from a refrigerator is colder than room temperature and allowances should be made when calculating cooking times.
- All instructions for microwave cookery are to be used as a guide, foods may require slightly more or less cooking, reheating or defrosting time.
- Always follow manufacturer's instructions and any cooking instructions on the food pack.

A GUIDE TO microwave features

This features guide explains some of the key functions you may wish to consider before you purchase your microwave oven.

Size/Capacity
The interior capacity of a microwave oven is measured in cubic feet, this can be used as an indication of the amount of food which can be cooked, defrosted or reheated. Our microwave ovens range from 0.55 cu ft, which would cater for smaller quantities, up to 1.12 cu ft.

Controls
All our ovens are controlled by either a dial or, for more accurate timing - and programming, by key pad. All have timers, automatically switching off the cooking cycle once cooking is complete.

Output Power/Wattage
The higher the wattage, the more powerful the microwave oven so the faster it will be able to cook.

Turntables
All of our microwave ovens have rotating turntables to ensure even cooking. Some have special boomerang turntables which return to the original starting position when cooking is finished - which is useful for removing handled pots from the oven. All turntables are removable for easy cleaning.

Grills
Some microwave ovens have a grill, which will brown and crispen food whilst combining the speed and convenience of a microwave oven. Grills can be used simultaneously on some of our models. (See individual products for details.)

The following features are exclusive to key pad operation models only:

Sequence Cooking
This feature allows you to programme the oven to cook at different power levels for different lengths of time, in sequence, enabling you to automatically defrost, cook and keep food warm until you are ready to eat.

Programmable Memories
Some microwave ovens have a memory facility which enables you to store your most used setting of defrosting, cooking or reheating.

Delay Start
This allows you to delay the start of your cooking while you are out, so that your meal is ready when you arrive home.

Auto Weight Defrost
Simply key in the weight, type of frozen food and the power level, and the defrosting time will automatically be calculated for you.

Auto Weight Cook
Simply key in the weight, type of food and the power level, and the cooking time will automatically be calculated for you.

Auto Defrost
This feature means that the power level is gradually reduced in stages to ensure that food is thoroughly and evenly defrosted.

FITTED WITH PLUG

All electrical items shown on these pages are supplied fitted with a plug.

Extended Guarantees

A GUIDE TO combination ovens

Combination ovens combine the versatility of a microwave, grill and convection oven all in one. You can use a combination oven as a microwave, grill or convection oven. This gives you the speed and efficiency of a microwave, with the advantages of an ordinary convection oven - which brings out the flavour, browns, and crispens your food.
Most foods can be cooked in combination mode, but combination ovens are particularly good for roast meat and poultry, cakes, vegetables and baked desserts.

SUPPLIER HELPLINES

Should you have any queries about your combination oven, please call the appropriate helpline during office hours.

REPAIR SERVICE

Repair Service. See page 632 for details.

For quality, choice and value, Elizabeth Duke has something special to offer you.

Hallmarks

Items of jewellery can come with various hallmarks. The following information should help you understand more about the quality jewellery you can purchase from Elizabeth Duke.

A B

The Sponsor's Mark. The initials belong to the article maker or sponsor.

375

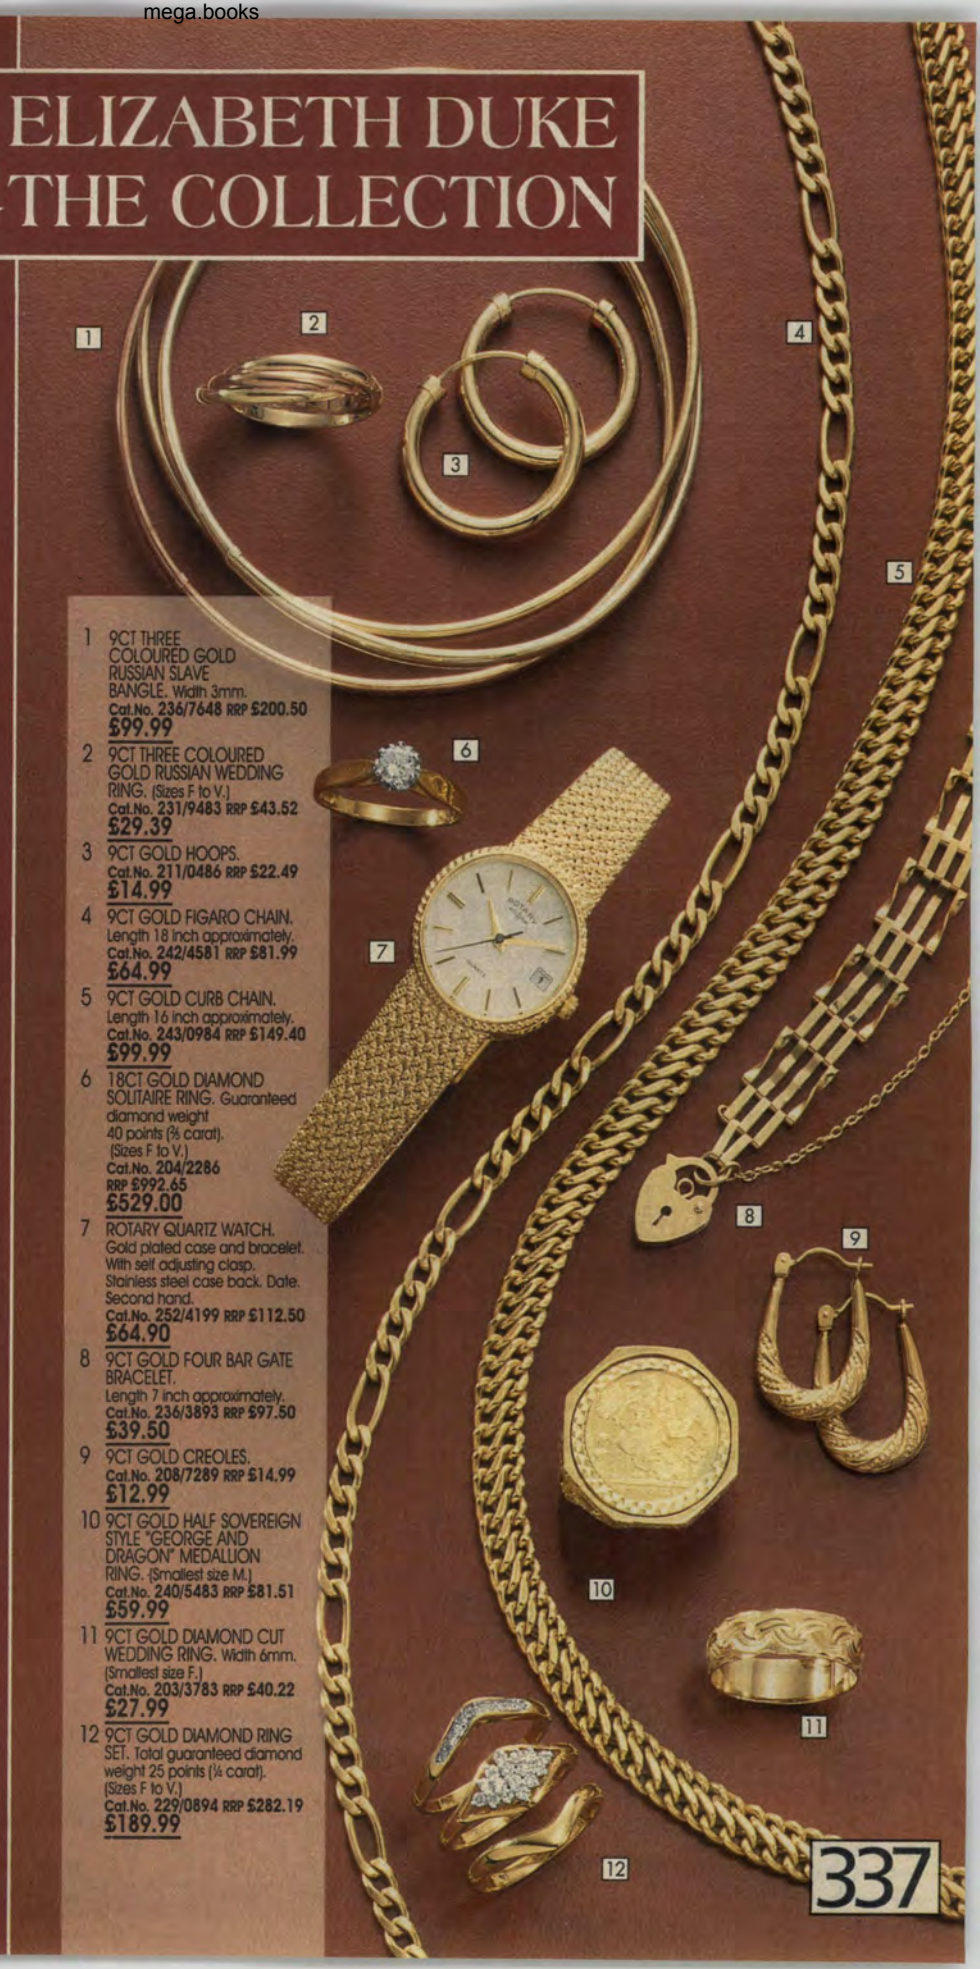

The Quality Mark. Certifies the quality of the gold and indicates its recognised carat value eg •375 is 9ct gold.

The Assay Office Mark. Shows the place where the gold was tested for quality. Birmingham has an Anchor, Sheffield a Rose, Edinburgh a Castle and London a Leopard.

The Date Letter. A letter of the alphabet indicates in which year the article was made eg 1991 an "R", 1992 an "S" and 1993 a "T". This changes each year.

Guaranteed Diamond Weights

Diamond weight is measured in carats and points. One carat is divided into 100 points:
1 Carat=100 points.
½ Carat=50 points.
⅓ Carat=33 points.
Where diamond weights are quoted for Elizabeth Duke jewellery, they are a guaranteed minimum weight for your assurance of quality and value.

CEYLON BLUE SAPPHIRE

This high quality stone is a softer, paler shade of blue than the darker Australian Sapphire. As the stone is more transparent, light is able to reflect and refract throughout and thus gives the stone its attractive light blue colour.

BIRTHSTONES

ALL ITEMS ARE GIFT BOXED

Stones relating to birthdays have been worn for centuries. Believed to have originated in Hebrew folklore the custom of wearing birthstones is still popular today. At Elizabeth Duke you can enjoy both tradition and fashion with our stylish range of birthstone rings.

22CT GOLD SOVEREIGNS

SOVEREIGNS are minted only by Her Majesty's Royal Mint from 22 carat gold. Each coin weighs exactly 1/8 oz and is acceptable as legal tender. Sovereigns and half sovereigns are sought after by collectors with some coins worth many times their weight in gold. All our jewellery is mounted in 9ct gold.

ALBERT CHAINS

T-BARS
This traditional design of jewellery was originally worn as a pocket watch chain. In the 19th century they were made popular by Prince Albert giving them the name "Albert Chains". Today they are worn as a fashionable jewellery item on neck chains or bracelets.

CARMEN INTRASONIC MASSAGER. Developed to aid temporary pain relief, help increase mobility of stiff, aching joints and muscles, and aid relaxation. Combines vibratory massage with soothing penetrating intrasonic sound waves that reach deep into the muscle. The effect felt on the skin will be gentle. This is quite normal and does not minimise the effectiveness of the intrasonic massage. Features include 4 applicators, long handle with flexible "neck" joint for difficult to reach areas and variable intensity control dial. Can be used in conjunction with your favourite oil or moisturiser and is ideal for foot reflexology. Supplied complete with storage case and 240V ac mains adaptor. **Not suitable for people with varicose veins.**

TAKING CARE OF YOUR SHAVER
Please see page 454 for details.

TO GAIN MAXIMUM SHAVING PERFORMANCE
Due to the sensitivity of your skin, you should allow approximately 2-4 weeks for it to adjust to your chosen shaver.

ARE YOU TAKING YOUR APPLIANCE OVERSEAS?
If so this simple guide may help.
- If your appliance has **automatic** or **universal voltage** there is no need to make any adjustment.
- If your appliance has a **dual voltage** switch you will not need to change the setting for European countries, most of which have 220-240 voltage supply systems, although an adaptor would be required (see page 45). However, if you take your appliance to the USA or Japan, you will need to change to the 110-130 volt setting. Please take great care to switch back to the 220-240 setting on your return to the UK or other European country.

ADAPTORS
Several shavers are described as being chargeable from a 12-24V dc supply. This can be achieved only in conjunction with an optional adaptor, available via our mail order service.

SHAVING TIMES
These are approximate and are based on an average of 3 minutes shaving per day. They are also dependent upon the strength and thickness of the beard.

TAKING CARE OF YOUR SHAVER
In order to prolong the efficiency/life of your shaver, frequent, thorough cleaning is required in accordance with your manufacturer's instructions. Foils and cutters should be replaced regularly.

TO GAIN MAXIMUM SHAVING PERFORMANCE
Due to the sensitivity of your skin, you should allow approximately 2-4 weeks for it to adjust to your chosen shaver.

ARE YOU TAKING YOUR APPLIANCE OVERSEAS?
See page 453 for voltage details.

ADAPTORS
Several shavers are described as being chargeable from a 12-24V dc supply. This can be achieved only in conjunction with an optional adaptor. These are available via our mail order service.

A GUIDE TO cameras

Most cameras are fitted with additional features to give greater flexibility when taking photographs. Some key features are explained below.

Features Guide

Flash

A Built-in flash works directly off the camera batteries and is usually effective for up to 15 feet. A low light indicator shows when to turn the flash on.
An **Auto/Sensor** flash will work automatically when there is insufficient light.
On some cameras, a sensor flash can be turned off for atmospheric shots, or used as "fill-in" flash when the subject is in the shade or against a bright background.
Red-Eye Reduction utilises a light or pre-flash to contract the subject's pupils to avoid "red-eyes".

Motor Drives

Motorized load automatically winds the film to the first frame - ready for use. After each shot, **motorized advance** automatically winds the film onto the next frame. At the end of the film, **motorized rewind** will rewind the film ready to take out.

Auto Focus/ Focus Lock

Basic cameras have a fixed focus, which does not vary depending on how far away the subject is. Cameras with auto focus automatically focus on the subject in the centre of the viewfinder. "Focus lock" allows you to focus on your subject and then recompose the shot, still holding your subject in focus.

Auto Exposure

The aperture varies to give the correct exposure for differing light conditions. On more sophisticated cameras a **programmed shutter** automatically adjusts the shutter speed. A **backlight compensation** facility allows for bright backgrounds such as snow or sand.

Zoom Lens

This allows you to bring the subject closer and frame the shot as required without having to move. The bigger the zoom (measured in millimetres) the nearer the image, and so the larger it will appear.

Twin Lens

This enables you to choose between normal or a close-up shot depending on how you wish to frame the subject.

Macro Facility

This allows you to take clear, focused close-up shots.

Infinity

This feature is used when taking long distance shots or for shooting through glass with an auto focus camera.

DX Coding

The camera will automatically adjust to the speed of film you are using.

Self Timer

This enables you to set the camera to take a photograph approx 7 seconds later, so that you can be in the shot as well! A dual self timer takes two pictures in succession whilst a special multi-frame self timer allows you to take up to four consecutive shots.

LCD Panels

On sophisticated cameras, these show the current function status, e.g. selected flash, focus mode, battery level and number of pictures taken.

Data Back

This allows the option of data to be printed on the face of your photograph enabling you to remember when the picture was taken and is available in two forms:

1. **A manual** data back will print the month and year if required.
2. **A quartz** data back offers a clock facility with LCD display and will print time/day/month/year if required.

Panoramic

This facility produces special "stretch" prints to create incredible scenic views or artistic compositions. These cameras either utilise an adaptor which is inserted prior to loading the film, in which case the whole film must be shot in panoramic mode, or a switch mechanism which will allow for shots to be mixed on the same film.
NB. Films containing mixed exposures will incur additional processing cost and we recommend that you advise the processor before having the film developed. Non-mixed exposures i.e. all panoramic exposures are also more expensive and you should ensure that the processor has the capability to print these type of photos before they are submitted for developing.

A GUIDE TO camcorders

A camcorder allows you to capture action in sound and vision. It gives high quality home video recordings and has a wide range of features to give you greater flexibility. To help you choose, our guide below explains some of the technical terms and features.

Tape Formats

There are 2 camcorder formats, using different types of tape.

8mm tape is a small cassette which gives up to 90 minutes recording, or 3 hours with **long play.** Tapes are played back by plugging the camcorder directly into your TV or video recorder using the leads supplied. Recordings can be edited onto VHS tape via a video recorder.

VHS-C is a compact tape which can be played in your VHS video recorder, using the special adaptor supplied with all of our VHS-C camcorders. They give up to 45 minutes of recording, which can be extended to 90 minutes with a **long play facility.**

VHS-C tapes can also be played back by connecting the camcorder directly into a TV or video recorder 21 pin SCART socket. If you do not have a video recorder or 21 pin socket TV, you will need to buy an RF lead and adaptor - available from Argos Mail Order Services (telephone 061 976 4505 or ask in-store for details).

Features Guide

Power Zoom
This gives a smooth zoom-in action for close-up shots. The greater the zoom, the greater the magnification.

Full Range Auto Focus
This ensures that the subject stays in focus, no matter how close or far away.

Intelligent Auto Iris
The auto focus facility works through the lens to give clearer shots and a better colour balance.

Programme Scene Auto Exposure
This control ensures the auto exposure is correct for different environments (sports, ski, twilight, parties or portrait).

Macro
A macro facility allows clear and focused close-up recordings.

Shutter Speed
A variable shutter speed allows slower speeds in low light conditions, whilst a high speed shutter gives clear shots for high speed action.

Lux Illumination
The lower the lux minimum illumination, the lower the light conditions in which the camcorder can still effectively record.

Fader
This allows you to smoothly fade in and out of different shots.

Flying Erase Head
When recording over old scenes this gives a cleaner transition from old to new recordings.

Title Memory
Title or dates can be superimposed onto recordings as a permanent reminder.

Edit/Camera Search
Previous recordings can be viewed through the camcorder for editing or to find the correct position to resume recording.

Long Play/Record
This feature allows you to record and play back for twice the normal time, ie 3 hours on a 90 minute tape.

Infra-Red Remote Control
This allows you to operate the playback features of your camcorder from the comfort of your armchair.

Insert Edit
This allows a new recording to be inserted between existing scenes.

A GUIDE TO televisions

If you are looking for a large screen or portable television, Argos has a wide range for you to choose from with a variety of features.

Features Guide

FST
This stands for "flatter squarer tube", which gives you improved definition, a wider viewing angle and less light reflection.

Teletext/Fastext
This gives you up to date information on a wide range of subjects such as travel, news, sports and television programming. Teletext also gives subtitles on selected television programmes.
Fastext is an updated system to give you quicker access to your chosen page of information.
In order to ensure satisfactory text reception it is recommended that portable teletext TVs are used in conjunction with an external aerial.

SCART Socket
A SCART socket when used in conjunction with SCART leads gives an easy connection between your television, VCR, audio system or satellite receiver dish. SCART leads can also be used to connect your Camcorder to the TV to play back recordings.

Sleep & Wake-up Timers
Particularly useful if you want to watch television in the bedroom, you can programme the timer to switch the television set to standby automatically, after you have fallen asleep. A wake up timer acts as an alarm clock.

NICAM
NICAM is a high quality digital audio signal which is transmitted simultaneously with television pictures, giving a similar sound quality to compact disc.
To receive the stereo NICAM signal a television or video must incorporate a NICAM receiver which picks up the signal through your existing TV aerial.
A NICAM video recording must then be replayed through a NICAM or Stereo TV to maintain the stereo sound.

On Screen Display
A visual display on the TV screen will show which channel you have turned to, or any adjustments to the volume or colour.

Extended Guarantees

Argos EXTENDED GUARANTEES

All our televisions have a 1 or 2 year manufacturer's guarantee, but for added peace of mind you can buy an Argos 3 or 5 year Extended Guarantee. We also offer **Free Accidental Damage Cover.** See page 3 for details.

TELEVISION SIZES:
Television sets have always been described by the nominal size of the glass tube across its greatest diagonal. The figures shown in brackets eg (V34cm) refer to the actual viewable picture diagonal. For FST sets which are normally quoted in cm we have rounded to the nearest inch for ease of comparison. Batteries are not supplied unless otherwise stated.

A GUIDE TO video recorders

All our VCR's allow you to record one programme whilst watching another. We also sell video players for watching pre-recorded videos, but these cannot be used for recording.

Programming

VCR's are programmed to record by using a remote control handset. Many have a visual LCD panel on the handset or an on-screen display showing the details entered.

Event Timer

You can programme most VCR's to record a number of events over a period of weeks.

Twin Speed

A twin speed (or "long play") facility allows the VCR to record and then play back at half the usual operating speed. The on-screen image appears as usual, but the recording time of a tape is effectively doubled. This gives 8 hours of recording on a 4 hour tape, however the quality of the recording may not be quite as good as when recorded at normal speed.

NICAM

NICAM is a high quality stereo sound signal. To receive the stereo signal, NICAM televisions and VCR's incorporate a NICAM receiver which picks up the signal through your existing TV aerial. A NICAM video recording must then be replayed through a NICAM or Stereo TV to maintain the stereo sound.

Extended Guarantees

Argos Extended Guarantees SEE PAGE 3

All our VCR's have a 1-year manufacturer's guarantee, but for added peace of mind you can also take out an Argos 3 or 5 year Extended Guarantee. We also offer FREE ACCIDENTAL DAMAGE COVER. See page 3 for details.

4. VIDEO PLUS+. Programming your video made easier. Every day, next to the TV programmes in most national newspapers, "Radio Times", "TV Times", "TV Quick" and "What's On TV", will be Video Plus Code™ numbers. Simply tap the code number of the programme you want to record into the Video Plus handset, press the appropriate button, to set once, daily or weekly and it will tell your video what to record. Video Plus stores up to 14 programme selections and works with virtually all videos and satellite receivers which have an infra-red remote control.

Reception Difficulties - A good TV aerial, correctly positioned, will improve a snowy picture and reduce ghosting. A signal booster will amplify weak signals or supply several TV sets from one aerial. However, a signal booster on its own will not always resolve local reception problems or cure ghosting. If you would like information on aerials or signal boosters please phone the Labgear Helpline 0800 616481.

A GUIDE TO audio features

To help you choose, we have explained some of the technical terms.

Features Guide

Digital Tuners
Phase Lock Loop (PLL) digital tuners seek out stations by searching the whole waveband automatically for the next strongest signal.

Pre-set Buttons
You can select your favourite stations to be recorded in the memory, and then recall them at a touch of a button.

Dolby 'B' & 'C'+
Dolby is a noise reduction facility that reduces the hiss when tapes are played, especially on "quiet" music. Dolby 'C' is the enhanced version of Dolby 'B', giving even clearer sound reproduction.

Relay Play
This allows the second tape on a twin tape deck to automatically take over when tape one has finished.

Auto Reverse
When your tape has finished, the cassette player automatically plays the other side.

High Speed Dubbing*
On twin tape decks, this allows faster tape copying, usually at twice normal speed.

Graphic Equalisers
This allows you to "shape" the tone of the music being played by increasing or fading particular sounds.
The greater the number of bands, the more precise the equaliser.

Spectrum Analyser
This provides a visual display of the sound level in the form of "dancing lights", enabling you to make fine adjustments to sound and tone levels.

Compact Disc
Compact discs provide the most accurate sound reproduction available.
On CD midi systems, a search button allows you to select which tracks you want to hear. A memory facility allows you to programme a sequence of tracks in any order.

Turntables
Belt driven decks ensure a constant rotational speed.
Fully automatic decks place the stylus on the record for you, and return it after the record ends. Semi automatic decks only return the stylus, you have to place it on the record.

Speakers
Within each speaker is a series of either 2 or 3 cones (known as "2 way" and "3 way" speakers). 3 way speakers usually give a better quality of sound.
Active speakers for use with personal CD's and stereos have their own power source to further amplify the sound.

Music Output
The higher the number of watts the greater the capacity of the amplifier and the louder the sound will be. 2 x 20 watts music power means that there are 2 speakers with a maximum music output of 20 watts per speaker. Manufacturers generally express the potential maximum volume in one of three terms:
As a comparison
1w RMS ≡ 2w MPO ≡ 4w PMPO

*** The recording and playback of certain material may only be possible by permission. Please refer to the Copyright Designs and Patents Act 1988 and the Performers Protection Acts 1958-72.**

+ Dolby is a TRADEMARK of Dolby Laboratories Licensing Corporation.

A GUIDE TO car audio

We sell a wide range of car stereos. Many of the functions are similar to those on hi-fi equipment, additional features include:

Fader
On 4-speaker systems you can adjust the sound balance between the front and back speakers.

Auto Seek Tuning
The radio automatically seeks out the next strongest signal on a waveband.

Radio Data Systems (RDS)
RDS displays the station name and maintains your chosen station automatically when travelling through different reception areas.

Extended Other Network (EON)
EON automatically interrupts your listening with travel bulletins when they are broadcast.

Extractable Units
Some units are designed to be easily removed when you leave your car and then on return simply slot into place for play. Please note, there are 2 sizes of car radio/cassettes. The latest, DIN E, will fit most cars built after 1983. DIN D will fit almost every car. Post 1983 models may require an adaptor plate. Please refer to your vehicle specification manual.

A GUIDE TO child safety

At Argos we sell a wide range of safety products which can help give you that extra reassurance and peace of mind.

Buying Toys

As your toddler begins to develop, there is a whole range of toys to buy. By following some key points you can make sure playtime is great fun for them as well as being safe.

- Always read the manufacturer's leaflet and retain for future reference.
- Make sure the toy is right for the child's age and ability - check the age recommendation before you buy.
- Keep older children's toys out of reach of young children and babies.

Safety in the Home

The following pages show some essential items which can help you make your home safe for baby. We have drawn up some key points in conjunction with RoSPA®, the Royal Society for the Prevention of Accidents.

- Fit a safety gate at the top and bottom of the stairs and keep stairs and landings clear of toys.
- Use a baby monitor to keep in touch with your child around the home, but remember there is no substitute for supervision.
- Use a fireguard securely fixed to the wall wherever you have a gas, electric or open fire.
- Make sure the side of the cot is securely fixed when your child sleeps and use a ventilated mattress.

Safety in the Car

When travelling by car there are certain points you need to remember to make sure the drive is safe as well as comfortable for your child.

- Check the child restraint is correct for the age and weight of your child and that it conforms to the appropriate British or European standard.
- Always read the manufacturer's leaflet as your child's safety depends on correct installation. If in doubt, check with your local Road Safety Officer.
- Check the child restraint harnesses each time you travel to ensure your child's comfort and security.

There is a wide range of child restraints which fit most car models on the following pages. Some child restraints may require fixing kits - check with your local dealer prior to fitting.

PUSHCHAIR DO'S AND DON'TS

DON'T: Carry additional children in/on pushchair. Hang shopping from handles or carry shopping in locations other than the shopping tray provided. Leave child unattended in pushchair. Allow child to operate your pushchair or use it as a toy. Machine wash pushchair seat unless it is advised in the instruction leaflet. Force pushchair into folded position - refer to the instruction leaflet if any difficulty.

DO: Ensure pushchair is correctly erected with primary latches in place before use. Return seat to the correct position, parallel to the handle (where appropriate) before folding. Ensure child wears a safety harness correctly fitted/adjusted. Ensure that child (and any other nearby children) are clear of moving parts before making any adjustments/ folding or unfolding. Take care when loading pushchair into a car boot that it is not crushed. Check regularly that all joints, fixings, straps and catches etc., are secure/in full working order.

TOMY JUMBLE JUMBOS. Push Jumbo along and she whizzes, clicks and her ears spin round. Turn to the left and the left ear stops moving – then turn to the right and see what happens! Drop the baby jumbos through the hat and each time it's pressed down, a baby tumbles out through the trunk which squeaks and her see-through tummy turns, which is great for giving baby jumbos spins or rides. **For ages 9 months and over.**

Cat. No. 354/3674 **£9.75**

2 (S) SUPERSTORES ONLY

TOMY CASTLE PLAY BLOCKS. Six different ways of matching up. Animal faces, castle windows, a royal family, 2 big pictures to build, shape sorters and the shapes can be used to make a fun castle. **For ages 10 months and over.**

Cat. No. 354/4707 **£4.95**

3. TOMY "LOCO MOTION" LOCO. Link up the loco with all its clever carriages and pull them along. Each carriage does something different. A carousel turns, coloured balls spin, a mirror revolves and a smiling teddy sits in a special carriage that makes all the others wind along behind the chunky little train. Press the ball in Loco's funnel and you'll be rewarded with a squeak. **For ages 9 months and over.**

Cat. No. 354/2376 **£9.75**

4 (S) SUPERSTORES ONLY

TOMY KEY HOUSE. This colourful double-sided activity house comes with a selection of chunky, easy to handle keys. Each key operates a different part of the house – the front door, dustbin, pram and flower pot – making surprise things appear and disappear! A dial on either side of the house alters the surrounding panoramic display – one changing night to day and the other turning the weather from good to bad. Open the windows to reveal figures who actually change their outfits as the panoramic display changes! The fun key house even has an integral handle making it easy to carry about. **For ages 1½ years and over.**

Cat. No. 354/3681 **£9.75**

5 (S) SUPERSTORES ONLY

SAFETY

It is important that young children are supervised by parents especially in group play situations. In addition to our usual safety checks, our paddling pools are independently tested for seam strength to help improve their durability.

The Lion Mark is a symbol of Toy Safety and all Argos toys are tested for compliance with exactly the same approved safety standard. Always choose toys that suit the age and ability of your child.

Batteries are not supplied unless otherwise stated. Due to the nature of Ni-cad rechargeable batteries it is possible that the first charge from new will not produce 100% capacity and may give less running time than future charges. Optimum performance is often obtained from the battery after the 3rd or 4th charge.

just why we are the premier incentives company in the U.K.

One of our clients recently had us blushing with pride. "If anyone can rest on their laurels," he said, "it's Argos Premier Incentives." "Thanks, but no thanks," we replied.

That's not false modesty. It's fact. Since 1979, Argos Premier Incentives have grown to become the UK's leading incentive and motivation company. Since then we have never stopped listening. We have never stopped learning. And we never will.

With pride – and a rare flourish of immodesty – we can say that the magnitude of our portfolio might just surprise you.

Open it and you'll find more than paper-based incentives such as Vouchers and Tokens. Our Premier Gift Collection catalogue, a first among so-called equals, is a showcase for the branded products we offer in merchandise-based systems. And our Premier Points Card is acknowledged as the benchmark for all other electronic motivation schemes.

If anything can match our portfolio, it's our back-up service. We have access to some of the largest resources in the UK. Our warehouse capacity, for instance, measures a formidable 2 million sq. ft.

While we're multi-facetted, we're also single-minded. Solutions are the last thing we think about: a clear understanding is the first. It is this approach which we have applied to blue-chip clients like Mobil, the Granada Group and Crown Berger Ltd. Our new brochure explains more. It demonstrates our belief in the principle of 'digest first, suggest later.' And shows how, while we serve big companies with pride, we serve smaller names without prejudice.

we've helped build customer loyalty with over 20 million Cards. Point taken?

The Argos Premier Points Collecting Card was the first ever electronic loyalty-building scheme.

To date we've issued over 20 million Cards. They've helped to increase market share for Mobil and they could do the same for you.

If customer loyalty is your number one priority, you should be talking to the UK's premier incentive company.

After sales care

The following guarantees do not affect your statutory rights.

Making sure that you are happy with your purchases both when you buy them, and after you have taken them home, is very important to us.

• See page 2 for details of the Argos 16-Day Money Back Guarantee.

• **If a product develops a fault, simply return it within 30 days of purchase (with your proof of purchase) and we will offer you an exchange or a full refund.**

• **We will provide a free-of-charge repair facility (normally within 16 days) on products which develop a fault and are returned to a store more than 30 days after purchase (with your proof of purchase) but within 12 months.**

• **Any product which develops a fault and has a manufacturer's guarantee beyond 12 months will be repaired in accordance with the terms of that guarantee.**

• **Many electrical appliances can also be serviced in your home, please ask in-store for details.**

Argos supports the guidelines for guarantees set by the British Retail Consortium.

Extended Guarantees for added reassurance

We offer Extended Guarantees on a range of electrical products plus FREE FIRST YEAR ACCIDENTAL DAMAGE COVER. See page 3 for further details.

Delivery Services

To make shopping at Argos even easier and more convenient, we offer the following delivery services

Free Home Delivery Service

- Anywhere in Great Britain (including Northern Ireland).
- Delivery normally within 14 days.
- Order in-store or by telephoning ARGOS DIRECT FREE LINKLINE (see below). We operate the Free Delivery Service on items which are too large or heavy to stock in our stores, delivering them free of charge direct to your home. These items are marked by the red lorry symbol and are not available for collection from any of our stores.

Free 3 Day Home Delivery Service

We are able to deliver certain items (only those marked by the 3 day red lorry symbol) on a fast delivery service, three working days from the date of order.

Free Delivery and Installation on Selected Computers

Our free home delivery on selected computers, also includes unpacking and setting up in the home. See page 175 for more details.

(This offer excludes the Scottish Highlands and Islands and the Isle of Man where we can only offer free delivery.)

How to Order

You can order any of the items covered by Free Home Delivery at the Customer Services area in our stores, or you can order by telephoning the ARGOS DIRECT FREE LINKLINE anytime between 8.00am and 10pm, 7 days a week giving your order and credit card details. Once you place an order, we will contact you to arrange delivery. Delivery will normally be within 14 days, unless otherwise indicated in the item description or at the time of ordering.

Argos DIRECT ☎ 0800 555899 FREE LINKLINE

Please note: The above 0800 Linkline number can only be used for placing orders for items marked in the catalogue with a red lorry symbol. When ordering you will be given an alternative number for any other queries.

Superstore Delivery Service

- Deliveries anywhere within 20 miles of any Argos Superstore.
- One small delivery charge covers as many catalogue items as you wish to order (excluding those delivered free by Argos Direct).
- Order by telephone or in-store.

Free Delivery and Installation on selected TVs*

As an extension to our Superstore Delivery Service, we also offer FREE DELIVERY AND INSTALLATION on all large screen televisions *(20 inch and over) and VCRs from any Argos Superstore.

Installation is to an existing electrical socket and adjacent aerial point. This offer applies within a 20 mile radius of any Superstore (mainland only).

See page 490 for more details.

How to Order

You can order by telephoning the Superstore during normal working hours, just giving your order and credit card details. Or you can arrange delivery when you order in-store (see over for your nearest Argos Superstore and telephone number).

Argos

Over 320 Stores Nationwide

We have two types of Argos stores, "Traditional" and "Superstore" - each has its own special catalogue containing a different number of products.

- The Traditional catalogue contains over 4,000 top quality products for you to choose from.
- The Superstore catalogue is where we have combined our normal traditional range with an extra 2,700 products exclusive to our Superstores.

Superstore Delivery Service

If you live within 20 miles of a Superstore you can order goods through our Superstore Delivery Service.

See page 635 for details.
